Santosh Trikha

Newmark Elementary School offers rigorous standards- based academic programs as well as high levels of academic performance in a multicultural setting. Our goal is to ensure that all students receive, learn, and apply grade level instruction. Teachers facilitate this learning with best initial instruction and targeted interventions to support each student's progress toward attainment of proficiency levels. Students demonstrate their learning and application of essential skills and knowledge on formative and summative school, district, and state assessments. Teachers utilize student achievement data to guide instructional decisions and planning.

We are continuing to implement a variety of strategies to assist our students in reaching state standards, including the Moving Into English Program, CAPS (Creative Before- and Afterschool Programs for Success) tutoring program, the Standards Plus program in Language Arts and Mathematics, the Learning Center, and all-day kindergarten to give students a stronger foundation.

Professional staff development is key at Newmark. Our academic focus has been to transition from State Standards to the National Core Standards.

Be Responsible, Be Respectful, Be Safe!

SCHOOL DATA

MISSION STATEMENT

Our vision is that Newmark will be a safe, stable, physical, and emotional environment so that all members will develop the self-esteem to value and respect themselves and others.

We view Newmark as a community of life-long learners. We believe that learning in a holistic manner fosters personal and academic growth and an understanding of cultural and individual diversity.

This philosophy will help develop successful, productive citizens who will continue to be life-long learners preparing for the future.
